✛ summary

I am a full-stack web developer interested in how we use technology as a tool to solve human problems and make possible creative endeavours across any industry.
I write in JavaScript and have experience using front-end frameworks and designing and managing back-end systems.

✛ employment

Decidata.tv   2016
Front-End Developer · Mexico City
Designed and built the company website with responsive web design and recommended work-flow solution and UX improvements for internal tools for a marketing analytics start-up using machine learning algorithms.
Technologies: HTML5, Bootstrap, CSS3 (Animations, Media queries), jQuery, PostgresSQL, Git, GitLab, Linux

✛ education

DecodeMTL   2016
Full Stack Web-Development Bootcamp
Foundational JavaScript bootcamp focused on the fundamentals of programming, front-end and back-end development.

British Columbia Institute of Technology   2012
Diploma of Technology Architecture, Building & Engineering Technology
Specialization – Economics/Construction Operations

✛ volunteering

Ladies Learning Code   2016
Montreal · Mentor
Recently enjoyed mentoring my first (of many future) coding workshops during National Learn to Code Day 2016: Interactive Stories & Game Making with HTML & CSS.
This organization complements two of my most passionate professional interests – education and the dissemination of open source tools to encourage people into tech.

Art+Feminism Wikipedia Edit-a-thon   2016
Montreal · Editor
Participated in the annual campaign to improve coverage of women and the arts on Wikipedia.
I was drawn particularly by my belief that the internet will benefit when authored by a more complete, collective point-of-view.

✛ technologies

languages: JavaScript [ES6], HTML5, CSS3, Sass
libraries: jQuery, React
repositories: BitBucket, GitHub, GitLab
frameworks: Compass, ExpressJS, NodeJS, Sequelize

✛ projects

bredcrumbz
Geolocation based app designed around a concise central function that lets you leave a trail of digital breadcrumbs to find your way back or send a friend on an adventure.
Built with: React, Google Maps, Flexbox, Express, Sequelize and MySQL.

✛ languages

English (native)

French (professional working proficiency)

Spanish (professional working proficiency)
